

Arvin Mark Atienza

Python Developer

Mobile: 09281969737
Email: atienza.new@gmail.com

Github: github.com/shoshin-programmer
Website: mark-atienza.com

Software Engineer with specialized experience on web development using Python, Django, and different front-end frameworks. Able to design, develop and deploy from client requests/problems into real world solutions with web development. **Focused on trying to solve the client problem before the tools of engineering.**

Projects

Personal website | mark-atienza.com

- Designed and created personally using React with NextJS.

Portfolio website | inks-and-watercolor.vercel.app

- Designed and developed using React with NextJS.

Other Projects are owned by previous companies but an overview is as follows:

- Scraping application with UI using PyQt and BeautifulSoup as the parser.
- Excel processing tool using Django with numPy and pandas.
- HR internal system for onboarding and retainment process.
- Finance Internal tool for processing invoices, bills, and documents.
